

The SmartLine® Controller by Weathermatic® is an industry award-winning irrigation control unit designed to maximize the efficiency of watering your lawn and landscape. By dynamically adjusting to real-time weather conditions combined with remote access by **Soils Alive** technicians for system checks and fine-tuning, this unit will save you the time and frustration of having to keep up with your property's seasonal, weekly, or even daily watering schedules. **Best of all, SmartLine® is included (installed!) when you sign up for the Soils Alive Irrigation Management Program!**

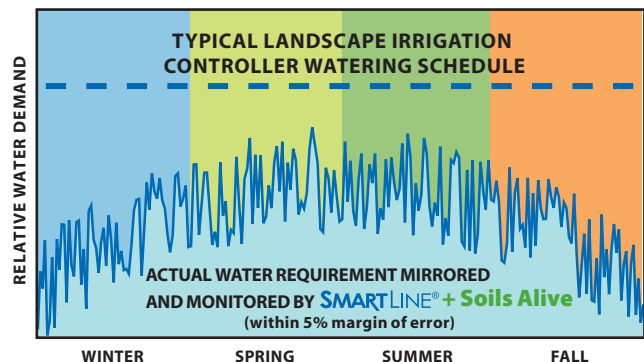

SMARTLINE®
SL1600 Controller
by **Weathermatic®**

Why SMARTLINE® + Soils Alive?

Relax from water worries. Save money. Save time. Save water. Save the hassle.

- 1. Real-time monitoring** of weather 24/7, adjusting your irrigation system as conditions change, combined with periodic system checks by **Soils Alive** technician.
- 2. On-site readings and watering adjustments (by remote control)** according to weather conditions and local water restrictions – all maintained by **Soils Alive**.
- 3. Zone-level adjustments** allowing for real-time changes to each watering zone, all monitored and tested by remote control of a **Soils Alive** technician.

SMARTLINE® features:

- Easy, single-dial programming
- Remote control access for **Soils Alive**'s system checks
- Dual-mode operation: a Standard (user-set) mode and Auto Adjust mode for watering by weather conditions
- Large backlit LCD display
- Non-volatile memory retains even after power loss
- Multiple programs, start times per program support
- Omit hours feature used for local watering restrictions
- Rain delay feature
- One-button press manual watering
